

ASBESTOS MANAGEMENT SERVICES

- Asbestos Inspections
- Abatement Specifications
- Project Design and Management
- On-Site Air Monitoring, Oversight, and PCM Analysis
- 3 Year Re-Inspections & Periodic Asbestos Surveillances
- Operations & Maintenance Program Development & Implementation

What is asbestos ?

Asbestos is a group of naturally occurring minerals whose crystals form into long, thin fibers. It has been used in thousands of products because of its unique properties such as high tensile strength, flexibility, acoustical properties, and resistance to thermal, chemical and electrical conditions. If inhaled, asbestos can cause diseases such as lung cancer, mesothelioma and asbestosis.

ANALYTICAL LABORATORY SERVICES

- PLM Bulk Sample Analysis for Asbestos
- PCM Fiber Analysis - NIOSH 7400A
- Qualitative Particle Identification

FACT:

Under rules set forth by the and the EPA, all public and commercially owned properties must be inspected for asbestos before any renovation or demolition activities begin.

LABORATORY QUALITY ASSURANCE

- Accredited Through the National Voluntary Laboratory Accreditation Program (NVLAP) for Bulk Materials Analysis.
- Accredited through the American Industrial Hygiene Association (AIHA) for Fiber Analysis using NIOSH 7400A.
